

FOR IMMEDIATE RELEASE

Cubesports adds new Counter Strike Source team

Milano, 24/05/2007

Cubesports is a brand held by Digital Community Agency (D.C.A. Snc), the Italian based company present and active in the competitive gaming with Counter Strike, Warcraft III, Call Of Duty 2, Pro Evolution Soccer 6 and Fifa. Cubesports are proud to announce the join of the Italian Counter Strike Source (CSS) team known as Not Available, that from today onwards will be an important part in the development of our brand in the e-sports community.

"After some change in our Counter Strike 1.6 lineup and the kick from the ESL Pro Series due to penalty points, we felt that some changes were necessary to let focus our players only on one game, that's why we took Not Available.

The negotiation just took few hours since both of us had the same goal, grow together. In two weeks the team will play their first live tournament under the cubesports' name, I'm sure that with our support and their hard training they'll keep improving and they will be able to achieve important results" said Nicola "nico" Besozzi, currently responsible of Cubesports' administration.

The cubesports roster will be composed by:

-  Andrea "Lucifero" Nicolis (Leader)
-  Benedetto "Brutal" Longanesi
-  Emanuele "nobody" Sciutto
-  Valerio "paveL" Matteucci
-  Nicola "nico" Besozzi
-  Matteo "Mage" Di Maio (backup)

Those guys, even if they're quite young as a team, already achieved some good results in many competitions and they're currently ranked 1st in the Online Group Stage of ESL Pro Series, one of the most important tournaments in Italy, with six wins and only one loss even if in the past months they changed few times the lineup.

Awards
